PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of professional experience **building and maintaining scalable applications** for a UAE-based **Web3 and cryptocurrency** company. Skilled in **Node.js, React.JS, Next.JS, Vue.JS**, JavaScript (ES6+), TypeScript, HTML5, CSS3 and **Mobile First Applications**. Using Tailwind CSS with hands-on experience delivering production-ready software solutions in agile **startup environments**. Experienced in developing and integrating **RESTful APIs**, implementing secure authentication systems, optimizing application performance, and building **Responsive Design, user-centric interfaces**. Proficient in mobile application development concepts, state management, **API Integration**, Git, Firebase, OAuth, JWT, and modern software architecture. Strong understanding of software development principles, application lifecycle, debugging, **Performance Optimization**, and cross-platform development. Experienced working with multicultural teams and business requirements aligned with the UAE technology market. **Seeking Frontend Developer opportunities in UAE** to build high-performance mobile applications and innovative software solutions.

TECHNICAL SKILLS

Tech Stack: React.js, Next.js 14, Vue.js, Node.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Apollo client

API: REST APIs, Axios, Fetch API, GraphQL (basic), Tanstack Query, APP Router, Sitemap, JSON, Context API

Auth & Security: NextAuth, OAuth 2.0, JWT, Session Management, Secure Login Flows

Performance: SSR, SSG, ISR, Custom Hooks, Lazy Loading, Accessibility (WCAG), SEO, React Hooks, ShadCN, Jira

Testing & Tools: Lighthouse, Postman, Figma, Git, GitHub, CI/CD, Webpack, Chrome Devtools

Concepts: Reusable UI Architecture, Responsive Design, React Server Components, Audio & Video APIS

Database / OS: MySQL (basic) | Linux, Ubuntu, Data Visualization

WORK EXPERIENCE

UI Developer (Web3) | NC Global Media FZCO(Remote)

Nov 2024 – Mar 2026 | Dubai, UAE

- Developed and launched a production-ready Web3 Crypto Blogging Platform using Next.js 14, React 18, TypeScript, and SSR/SSG, delivering high-performance content experiences and improving page load speeds by approximately 40%..
- Integrated 10+ RESTful APIs and crypto data services, enabling dynamic content publishing, real-time market insights, user engagement features, and seamless communication between frontend and backend systems.
- Implemented secure authentication and authorization workflows using NextAuth, OAuth 2.0, and JWT, ensuring protected user access, reliable session management, and a secure publishing ecosystem.
- Built 15+ reusable React components and optimized SEO strategies, improving code maintainability, accelerating feature delivery, increasing organic traffic, and enhancing user engagement across the platform.

Full Stack Developer Intern | SynapseSpark Software

Aug 2024 – Oct 2024 | Chennai, India

- Developed 2 responsive web applications using React.js and JavaScript ES6+, focusing on component-based architecture and cross-browser compatibility.
- Created reusable UI component library adopted across both projects, improving team development speed by an estimated 25%.
- Integrated frontend features with backend services via REST APIs, ensuring smooth data flow and functional user interactions across all modules.

EDUCATION

B.Tech in Computer Science and Engineering

Aug 2020 – May 2024 | Chennai, India

SRM Institute of Science and Technology | GPA: 8.9 / 10

PROJECTS & RESEARCH

Environmental Data Analysis — Air Quality Monitoring & Control

- Built an ML model predicting air pollution levels from environmental datasets; achieved high accuracy in identifying pollutant sources and detecting trends.

Published: IGI Global — DOI: 10.4018/979-8-3693-8659-0.ch015

Public Assault Prediction — Human Activity Recognition with AI

- Engineered an AI system classifying behavioral/movement data to detect suspicious patterns, improving early threat identification accuracy.
